*Community Source Watersheds: Each community's drinking water source watershed was mapped at a scale of 1:250,000. Information from Satellite imagery, 1:250,000 and 1:50,000 scale topographic data and the National Scale Frameworks Hydrology - Drainage Network data (1:1,000,000 scale) were used to create this new dataset.

**For this layer only those items found within the map extents are displayed in the legend.
