NOTES
Highway measurements (in kilometers) were created through a linear referencing procedure using the NWT Centre for Geomatics conflated roads feature class.
Map distance labels do not match kilometer marker posts the GNWT Department of Infrastructure (INF) has placed along NWT highways. This is due to differing measurement systems. There will be close approximations between both, however due to the differences, there can be accumulated variations between the two systems in excess of 5 kilometers towards the end of a highway.
